In re the Application of:

Mu-hyun KIM, et al.

Serial No. 10/694,044

Group Art Unit: 1774

Confirmation No. 3882

Filed: October 28, 2003

Examiner: Dawn L. Garrett

For: DONOR FILM FOR LOW MOLECULAR WEIGHT FULL COLOR ORGANIC ELECTROLUMINESCENT DEVICE USING LASER INDUCED THERMAL IMAGING METHOD AND METHOD FOR FABRICATING LOW MOLECULAR WEIGHT FULL COLOR ORGANIC ELECTROLUMINESCENT DEVICE USING THE FILM

STATEMENT OF SUBSTANCE OF INTERVIEW

Commissioner for Patents
PO Box 1450
Alexandria, VA 22313-1450

Sir:

In accordance with the interview Summary mailed November 13, 2006, a Statement of Substance of the Interview must be filed on or before December 13, 2006.

The Statement of Substance is as follows. On November 9, 2006, Applicant's Representative met with Examiner Garrett to discuss the prior art of record used in the rejection of the claims. During the interview, Applicant argued that neither Kwon nor Akai specifically disclose the term of a "hole blocking layer," and therefore the references fail to anticipate the claims. The Examiner indicated that further clarification would be provided in a future Office Action with regard to the equivalency of an electron transporting layer and a hole blocking layer. The Examiner also indicated during the Interview that the incorporation of some of the features of claim 27 into claim 1 might further prosecution of the application.

Respectfully submitted,

STEIN, MCEWEN & BUI, LLP

Date: 11/30/06
